

Products for Healthcare Cleaning

*Hospitals ~ Doctors' Offices
Outpatient Centers ~ Rehab Centers
Long Term & Urgent Care Facilities*

Cleanliness, Value & Sustainability

Today's healthcare facilities are challenged by ever-increasing competition and change. At Continental, we understand that **cleanliness** is so much more than just keeping the facility clean and orderly. First impressions make a statement to patients and visitors about the way a healthcare facility is managed and the level of care offered. And value is no longer an accidental benefit. We get it. Our comprehensive line of cleaning and recycling tools are ideally suited for the healthcare industry.

SUSTAINABILITY:

Now more than just a buzz word! Our focus on sustainability runs throughout our entire organization and at every one of our manufacturing facilities. Over the years, we've made numerous changes to raw materials, modified our plants, developed new products to improve green cleaning and have developed a package of Distributor Education and Training materials to support the market. All while ensuring that we maintain or improve product performance and appearance.

VALUE:

No longer just an accidental benefit! Many things have changed in the way healthcare facilities are operated and maintained. Through the continuous growth, consolidation and rising costs, one thing has remained constant . . . Continental Commercial Products remains the best value in cleaning.

CCP Brands Provide a Complete Line of Cleaning & Recycling Tools

Ideally suited for the dynamic needs of today's healthcare facilities!

Microfiber, Floor Care & Safety, Receptacles & Material Handling,
